**Enviro Club activity 2017-2018**

**Title: “Man Vs Tree.**

**Date: 21.09.2017**

Enviro club conducted one day guest lecture environmental awareness program by

**Mr. Mohandas**, Rtd Agricultural officer, Kancheepuram on **21.09.2017**, entitle “**Man Vs Tree.**

Dr. A. Mohamed Sadiq, Principal presided over the function; Dr. K.Rajesh Assistant Professor, Department of Microbiology welcomed the gathering. The chief guest was honored by Dr. A. Mohamed Sadiq, Principal.

Our chief guest's delivers about the Trees' food-making process, photosynthesis, involves absorbing carbon dioxide from the air and storing it in its wood. Trees and plants will store this carbon dioxide throughout their lives, helping slow the gas's buildup in our atmosphere that has been rapidly warming our planet. Access to nearby green space also contributes to better physical health by encouraging us to move around and exercise. Because we move around more when we have access to trees and parks, nature can help lower rates of obesity.

Finally, Dr. T. Panneer Selvam, HOD in the department of Microbiology proposed a vote of thanks.
